Total Orders and Count of city by Month

Sum of order\_qty by product\_name

order\_qty by city and Month

- Based on the Product Category insights, we can observe that the most popular items are AM Milk products, which are also the most ordered in terms of delivery amount and the most frequently delayed.
- AM Milk has the greatest percentage of deliveries that are both late and delivered on schedule.
- We can't provide it before the deadline. We are out of stock, thus we are unable to fulfill the high demand in full or in quantity. We can see from the order lines that there are more AM Butters, which indicates that our consumers demand AM Butters in their orders.
- AM Curd has a high fill rate, indicating that it is

provided in full without taking into account the time required to provide information to clients.

- The VOFR% figures of every product are essentially the same.
- The LIFR% figures of every product are comparable. The gap between the top and lowest LIFR values is little over 1%.
- The data for IF%, LIFR%, OT%, OTIF%, and VOFR% show that June has the lowest levels.
- Among the months, it also has the largest rate of delivery delays.
